

## Quality Policy, Food Safety and Environment

### **General objectives**

Customer satisfaction  
Food security  
Company consolidation  
Environment  
Social responsibility

### **Customers satisfaction**

**Quality** – This is The goal. We want to provide customers with an exclusive opportunity to buy a product distinguished by high quality, produced in-house using our own raw materials, controlling all processes from olive production to obtaining extra virgin olive oil. In the production of table olives and almonds, we aim to achieve the specifications of these products. We are also concerned about having an attitude that meets the expectations of our customers in all the commitments we undertake.

### **Food security**

**Guarantee** – Through the Food Safety Management System, we seek to ensure the control of food safety risks in our processes. Compliance with all applicable legislation is also a constant concern.

**Culture** - With the goal of building a culture of food security, we strive to share values and practices to encourage everyone to become aware of their involvement and behavior related to food security.

### **Company Consolidation**

**Solidity** – At Innoliva we intend to maintain a solid structure based on respect for our employees, their safety and well-being, continuously counting on their participation and commitment to promote the company's continuous and sustainable growth;

### **Environment**

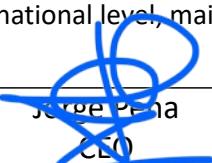

**Protection of the environment and pollution prevention** – We know that our activity depends on the environment and therefore, to ensure continuity, we work every day to ensure guarantee the greatest efficiency in resource management in order to reduce environmental impacts, we seek to ensure compliance with all the obligations.

In that regard, we guarantee the success of this effort by producing 100% of our products according to the Integrated or Biological Production Methods.

Aware of the scarcity of resources, particularly in the region we are involved in, we are even more committed to monitoring the water and energy use and the evolution of soil characteristics. Knowing the importance of communicating all this to the concerned parties, we seek to certify our practices and results through external entities, taking every opportunity to improve, both for ourselves and for the environment.

### **Social responsibility**

**Development** – Located in a rural area, we are aware of the importance of our project for a sustainable development of the region, employing local human resources and working directly or indirectly with local suppliers. We also contribute at the national level, mainly by exporting a large part of our production.
